 each of items 2a, 2b
 and 2 each of items
 3, 7, 8, 11, 12, 13

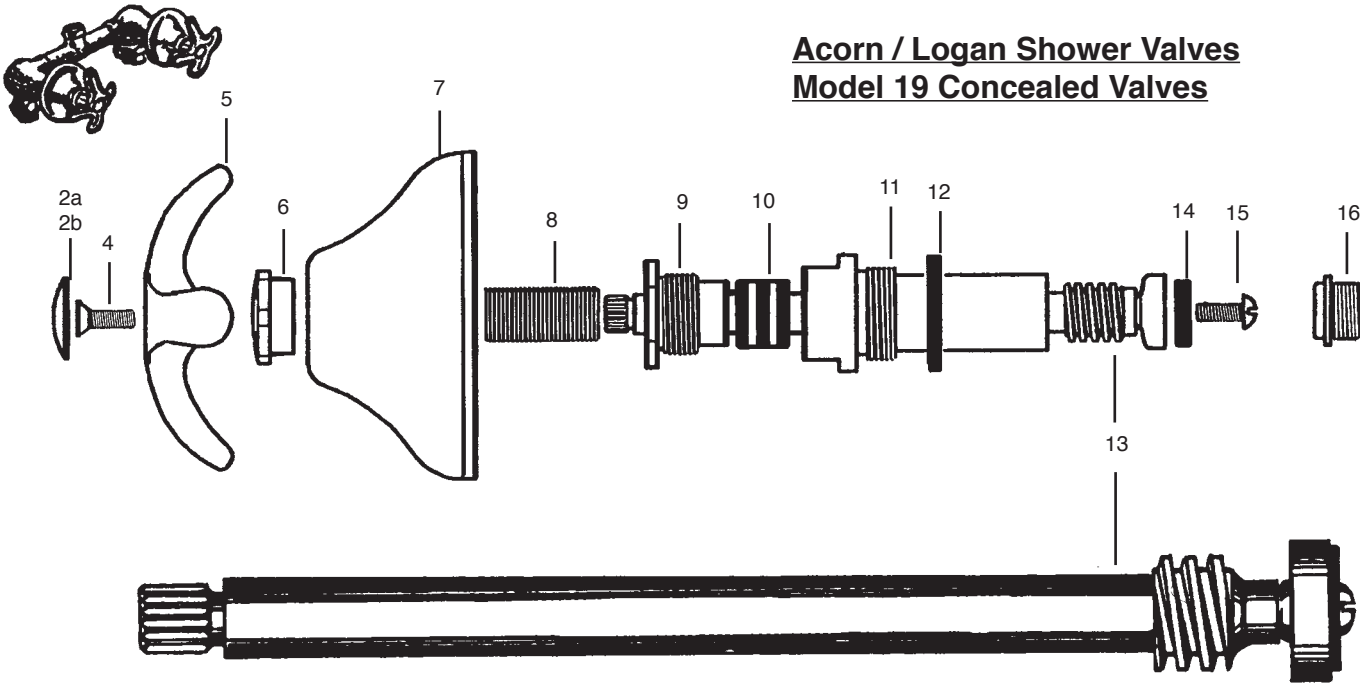

**For Vandal Proof Screw Installation**

The handles and stems for these valves do not come tapped for installation of the vandal proof headless screw 1/4" x 10/32" (part #12543). After driving the handle onto the stem, drill a 7/32" x 1/4" hole at any point in the serrations of handle and stem where they meet. Then tap the hole with a 10/32" tap so the vandal proof screw can be installed before assembling the hot or cold welch handle plug buttons.

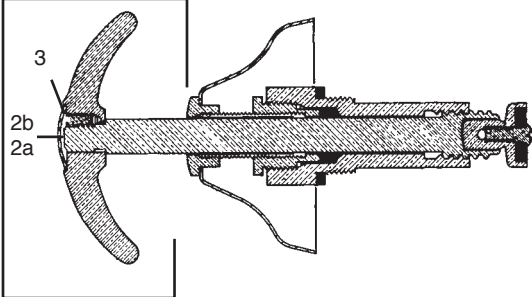

To remove a handle welch plug button in order to repair a valve, drill a 3/16" hole in the welch button and use a center punch to pry it out of the handle. The vandal proof screw can then be removed from the stem.

If more than one Acorn/Logan valve is being repaired, make sure like handles and stems stay together.

Item	Number	Description
